

What the difference in brain structure between liberals and conservatives?

What the difference in brain structure between liberals and conservatives? And where do our political convictions come from: rational deliberation, or biological determinism?

Liberalism and conservative are a philosophical discourse discussion, dialectic speech, discussion about rationality and intuitional philosophy and both of them are worldview lecture, and any contest or challenge related to these two concepts, having basis criteria and who can discuss around a subject that he/she can define that subject to detailed criteria, for example: we say, free markets, what is it mean , it means , everyone can do everything or not , how about distribution's justice in this market , is it win-win truly or this interactive dealing is as a collusion and so on? , and conservatism ,it is social philosophy matter , rationality and intuitional philosophy , both of them , Conservatism as a political and social philosophy promotes retaining traditional social institutions in the context of culture and civilization. Some conservators seek to preserve things as they are, emphasizing stability and continuity, while others, called reactionaries, oppose modernism and seek a return to "the way things were". The first established use of the term in a political context originated by many philosophers ,The term, historically associated with right-wing politics, has since been used to describe a wide range of views.

Therefore, should be established the range of the difference between the worst and best of Liberalism and conservativeness, and then, the key factors of both be compared whit them (by math models), the data should be truth and righteous, in this surveying, we don't have interpreters enough, one who can translate from any data, by suitable hermeneutic to another as clarifier, explainer and commendatory, therefore, all universities must train students in MS or doctoral course as interpreters enough , it is difference between righteous understand and relative or reliability(dependability) understanding , I wrote this subject in Persian language(is attached), also , I have researched and learned about usefulness science in during 30 years , and we should establish a university about this matter.
